Above the rim wand jet placement – for maximum hygiene

Every WASHLET™ features proven TOTO clean technologies. Importantly placing the wand jet above the toilet bowl thus avoiding contamination. This keeps the WASHLET™ incredibly clean – like the very first time it was used. The TOTO WASHLET™ is a shower toilet with the highest hygiene standards.

WASHLET™
TOTO always positions the wand jet above the ceramic bowl

Conventional shower toilet
Wand jet placed within the toilet bowl

Hygienic wand jet
Positioned above the ceramic bowl – away from the “action”
Condensate cannot come into contact with urine or faeces after use
Condensate cannot come into contact with flushing water
A higher position protects the wand jet and components from being affected by every water due to a clogged toilet

Great potential for contamination
Positioned in the middle of the “action”
Tip of the wand jet can come into contact with urine and faeces
Wand jet can come into contact with flush water
Wand jet and technology are placed within the toilet bowl, and can be contaminated if the toilet is clogged

WASHLET™ The ultimate solution for quality and hygiene

Cleanliness and comfort. TOTO makes the difference.

Gentle warm water cleansing, odour extraction and a heated seat enhance the well-being of everyone who uses WASHLET™. Comfort is a top priority for all TOTO products – it’s how we turn daily habits into enriching experiences.
Above the rim wand jet placement – for maximum hygiene

Every WASHLET™ features proven TOTO clean technologies. Importantly placing the **wand jet above the toilet bowl** thus avoiding contamination. This keeps the WASHLET™ incredibly clean – like the very first time it was used. The TOTO WASHLET™ is a shower toilet with the highest hygiene standards.

**WASHLET™**
TOTO always positions the wand jet above the ceramic bowl

**Conventional shower toilet**
Wand jet placed within the toilet bowl

---

**Hygienic wand jet**
- Positioned above the ceramic bowl – away from the “action”
- Cannot come into contact with urine or faeces after use
- Cannot come into contact with flushing water
- A higher position protects the wand jet and components from being affected by rising water due to a clogged toilet

**Great potential for contamination**
- Positioned in the middle of the “action”
- Tip of the wand jet can come into contact with urine and faeces
- Wand jet can come into contact with flush water
- Wand jet and technology are placed within the toilet bowl, and can be contaminated if the toilet is clogged
WASHLET™
As clean as brand new – with every use

Wand jet position
The wand jet extends at a 43° angle during cleansing. This careful positioning means faeces cannot come into contact with the wand jet during cleansing.

Hidden jet above the rim
The fully covered chamber protects the wand jet and dryer from dirt and contamination.

Rimless design
The rimless toilet bowl is standard on all TOTO toilets. There are no difficult to reach places for dirt and waste to accumulate.

Self-cleaning wand jet
The wand jet automatically cleans itself inside and out before and after each use.

PreMist
A fine mist of water is sprayed on the ceramic surface, forming a water film that makes it more difficult for waste and dirt to accumulate.

Wand jet material
The wand jet is made of a silicone-based material, which makes it difficult for dirt or waste to stick.

CeFiONtect glaze
The glaze is extremely smooth, durable and long-lasting.

Tornado Flush
Each toilet features the highly effective Tornado Flush.
WASHLET™
For every taste and price class

Millions of customers around the world rely on their TOTO WASHLET™. Nearly 40 years of experience guarantee the best hygiene and most sophisticated technologies.
